RE: B881 & B887 Facility Disposition RSOP Notification

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has reviewed your April 7, 2004 letter (received on April 14, 2004) notifying us that the Facility Disposition RSOP will be utilized during the demolition of Buildings 881 and 887, as well as the attached information. The attached information includes: Attachment I - Evaluation of Demolition Methods for Building 881; Attachment II - Building 881 Demolition Strategy; Attachment III - Project-Specific Administrative Record; Attachment IV - Level One Project Schedule; Attachment V - B881 Tunnel, Stack Foundations, and Vaults - Structural Analysis for Prediction of Long-term Condition; Attachment VI - Building 881 Slope Stability Analysis; Attachment VII - Construction Specification Section 02220, Fill and Backfill; and Attachment VIII - Construction Specification Section 02225, Special Backfill. We have provided and discussed our comments with Dyan Foss regarding this information. Resolutions have been reached and appropriate changes have been made to these documents. We hereby agree that B881 and B887 may be demolished utilizing the Facility Disposition RSOP, with the following comments/reminders:

1. Both Building 881 and 887 must meet the unrestricted release criteria as shown in Table 3 prior to demolition.
2. Prior to demolition of Buildings 881 and 887 a PDSR must be submitted to us for our review and approval. However, if sections of these buildings are to be demolished or removed prior to demolition of the entire building, then sufficient PDS data and other information as requested by us (which will also be included in the PDSR for the whole building) must be provided to us for our review and approval before this partial demolition activity can occur.
3. The requirements identified in Section 4.2.2.6. must be followed if explosives are going to be utilized.

If you have any questions regarding this correspondence please contact me at (303) 692-3367 or David Kruchek at (303) 692-3328.

Sincerely,

Steven H. Gunderson
RFCA Project Coordinator
